Observations-

- Depending on the Airline and Fare price , cancellation amount will be generated by the Airline on basis of RBD
- First basis of comparison will be the condition when Cancellation is requested – Before / After Departure / Anytime
- Second basis of comparison will be the ticket type – Either Refundable or Non refundable
- Exceptions are considered as Extra Requirements in the Policy (shouldn't be ignored)
- Next basis on Cancellation is the CCY in which amount has to be charged or Refunded
- Almost all the rules follow a general pattern , with all the comparison attributes.
- Anything following to the WITH word is a condition or a requirement that has to be met. It can be any INCLUSION/ EXCLUSION or PENALTY applied.

Note – While Designing Algorithm we can use DAG method and create a Tree , prioritize our Comparison attributes and sort them on the basis of their importance)
